

# 41st ANNUAL SEEDLING SALE 2016

All proceeds from the sale benefits Sweet Arrow Lake!

Your quality seedlings will increase property value, enhance wildlife habitat, beautify the landscape, improve the environment, and can provide a source of income. Proceeds benefit programs at Sweet Arrow Lake County Park. The Sweet Arrow Lake Conservation Association (SALCA) and the Schuylkill Conservation District work together on this sale. ***Your support is greatly appreciated!***

- **CONCOLOR FIR:** Extremely popular tree in past sales. Excellent ornamental or Christmas tree. Has flat, soft green to deep blue citrus-scented needles. Hardy because it withstands dry periods and high temperatures. 4 year old seedlings. Size: 8-16.”
- **NORWAY SPRUCE:** Fastest growing of the spruces. Develops pyramidal shape and strong graceful branches that are covered with dark green needles. Ideal windbreaker that likes full sun and grows in various soils. Matures at 60 feet and has a beautiful 25 foot spread. 4 year old seedlings. Size: 10-24.”
- **BLACK HILLS SPRUCE:** Desirable, symmetrical cone shape to this evergreen conifer. Dense bright-green needles mature to an interesting blue-green. Great landscape accent, useful as windbreak or screening. Browsed by mammals and attracts birds. Serves as a good yard or ornamental tree either solo or in a group. 5 year old seedlings. Size: 10-24.”
- **AUSTRIAN PINE:** This is an extremely tolerant pine of adverse soil conditions. This stately tree can be seen in parks, along streets, in residential landscapes, and as farm windbreaks throughout much of the United States. Landscapers use the dark beauty of these trees for backdrops, but it is also an excellent specimen tree because of its leaf pattern. Can grow up to 60 feet high with a 20-40 foot spread. 4 year old seedlings. Size: 10-28.”
- **AMERICAN ARBORVITAE:** This slow-growing tree prefers full sun to partial shade but adapts to a variety of soil conditions. Prefers moist soils but can withstand drought. It grows to a mature height of 25-40 feet, and has a mature spread of 10-15 feet. Makes a good wind-block and provides cover for all types of wildlife year round. 3 year old seedlings. Size: 6-12.”
- **RED MAPLE:** This maple grows at a moderate to rapid rate and does best in bright sun to partial shade. It will grow in a range of soil types from sandy loam to clay. Better soil will result in a better healthier tree. The tree has a pyramidal shape when young. When the tree matures it will attain a larger more rounded crown and will grow to a size of 40-60 feet with a width of 25-45 feet. Leaves turn a brilliant red during fall and accent any yard. 2 year old seedlings. Size: 5-10.”
- **RED OAK:** Very popular landscaping tree for shade on lawns, parks and golf courses. This oak is fast growing and easy to transplant. It is tolerant of urban conditions including dry and acidic soil and has abundant acorns that attract wildlife. Leaves turn a brilliant brick-red fall color and adds color to a forest. This tree has been used in mine reclamation sites for revegetation purposes. 2 year old seedlings. Size: 10-24.”
- **TULIP POPLAR:** This tree is considered both a shade tree and an ornamental tree. It features a spreading canopy capable of blocking sunlight and adds visual interest and beauty to landscaping. It is the tallest of the eastern hardwoods—and a rapid grower when conditions are right. 2 year old seedlings. Size: 10-28.”
- **AMERICAN CRANBERRY:** *Popular seedling the last three years!* This is an excellent deciduous shrub for screening up to 10 to 12 feet high. It grows to a width of 8 feet with very dense growth of up to 3 feet per year in full sun or part shade. This bush has showy white flowers in spring followed by red berries in fall and winter. Berries hang through mid winter making excellent bird feed. This shrub has very few insect problems and prefers good, well-drained soil. For best growth, provide supplemental water during dry periods. For a solid screen, plant bushes 2 to 3 feet apart. 3 year old seedlings. Size: 10-22.”
- **FORSYTHIA:** Beautiful yellow-flowered shrub that is fast-growing to about seven feet tall. Tolerates poor soil and city conditions. Good for screens and hedges and cover for birds and small wildlife. 3 year old seedlings. Size: 10-24.”
- **WINTERBERRY:** Winterberry is a deciduous shrub growing to 6-15 feet tall and often as wide. It develops a rounded habit through suckering, eventually growing into a sizeable colony of upright stems. The stems tend to be dark brown and often develop a pleasing gray sheen. The 3 inch long, elliptic, toothed, and pointed leaves vary from light to dark green, taking a yellow hue in autumn. Insignificant flowers appear in May – June and are followed by bright red berries in late summer. The berries, for which the common name was derived, remain after leaf fall and persist into the winter months to provide food for wildlife. Winterberry prefers evenly moist, acid soils in full sun to partial shade. 3 year old seedlings. Size: 8-18.”
- **COMMON LILAC:** A medium to large hardy shrub with stout, spreading branches developing a somewhat oval to irregularly-rounded crown. The showy flowers are very fragrant and enjoyed each spring. 3 year old seedlings. Size: 10-20.”

# 41st Annual Seedling Sale Order Form—2016

## To benefit Sweet Arrow Lake County Park

- **ORDER DEADLINE:** Wednesday, April 6, 2016 or while supplies last!
- **PICK UP DATE, TIME, LOCATION:** Saturday, April 30, 2016 from 9:00 a.m. to 12 noon in the Clubhouse parking lot located off Rt. 443, Pine Grove
