

46th Annual Seedling Sale

To benefit Sweet Arrow Lake County Park

Your seedlings will increase property value, enhance wildlife habitat, beautify the landscape, improve the environment, and can provide a source of income. *Thanks for your support of the lake!*

- **AUSTRIAN PINE:** This is an extremely tolerant pine of adverse soil conditions. This stately tree can be seen in parks, along streets, in residential landscapes, and as farm windbreaks throughout much of the United States. Landscapers use the dark beauty of these trees for backdrops, but it is also an excellent specimen tree because of its leaf pattern. Can grow up to 60 feet high with a 20-40 foot spread. 3 year old seedlings. Size: 10-15.”
- **NORWAY SPRUCE:** Fastest growing of all spruces. Develops pyramidal shape and strong graceful branches that are covered with dark green needles. Ideal windbreaker that likes full sun and grows in various soils. Matures at 60 feet and has a beautiful 25 foot spread. 3 year old seedlings. Size: 8-12.”
- **CONCOLOR FIR:** Excellent ornamental or Christmas tree. Has flat, soft green to deep blue citrus-scented needles. Hardy because it withstands dry periods and high temperatures. 3 year old seedlings. Size: 6-12.”
- **EASTERN REDCEDAR:** Pyramidal evergreen growing up to 50 feet. Medium green needles are flat and scale-like. Grayish to reddish brown bark is considered part of its ornamental interest. 2 year old seedlings. Size: 3-6.”
- **RED OAK:** Very popular landscaping tree for shade on lawns, parks and golf courses. This oak is fast growing and easy to transplant. It is tolerant of urban conditions including dry and acidic soil and has abundant acorns that attract wildlife. Leaves turn a brilliant brick-red fall color and adds color to a forest. This tree has been used in mine reclamation sites for revegetation purposes. 2 year old seedlings. Size: 10-18.”
- **WHITE FLOWERING DOGWOOD:** Prolific, large, pure white, overlapping petal-like blooms in spring, dark green foliage in summer, red-purple leaves in fall and glossy red berries that persist into winter make this a lovely ornamental tree for all seasons. It has a short trunk, horizontal branches, and a moderately globe-shaped crown. The dense branching provides shade and nesting sites, fruit and buds are a favorite with dozens of bird species, and the nectar and pollen attract butterflies. Dogwoods prefer acidic, moist, well drained sites with partial shade, but will take full sun. 2 year old seedlings. Size: 4-8.”
- **WINTERBERRY:** Winterberry is a deciduous shrub growing to 6-15 feet tall and often as wide. It develops a rounded habit through suckering, eventually growing into a sizeable colony of upright stems. The stems tend to be dark brown and often develop a pleasing gray sheen. The three inch long, elliptical, toothed, and pointed leaves vary from light to dark green, taking a yellow hue in autumn. Offers bright red berries in late summer. The berries, for which the common name was derived, remain after leaf fall and persist into the winter months to provide food for wildlife. Winterberry prefers evenly moist, acid soils in full sun to partial shade. 3 year old seedlings. Size: 12-18.”
- **SILKY DOGWOOD:** Deciduous spreading shrub. Multi-stemmed shrub with dense foliage and rounded form. New stems are reddish purple with fine silky hair. Flexible stems will root where they are in contact with the ground. Clusters of small white flowers in spring, followed by blue berries which ripen to black. Flowers attract butterflies. Fruit eaten by many birds. Leaves and twigs browsed by deer and rabbits. One of the more shade tolerant shrubs for moist soil. Used for restoration and ground stabilization because it readily roots from stems. 2 year old seedlings. Size: 4-8.”
- **LILAC:** A medium to large hardy shrub with stout, spreading branches developing a somewhat oval to irregularly-rounded crown. The showy flowers are very fragrant and enjoyed each spring. 2 year old seedlings. Size: 8-12.”
- **MYRTLE:** Often called Periwinkle. Nursery grown ground-hugging plant growing 3 to 6 inches in height. Extra large leaf with perfect, lilac-blue, blue-violet flowers March-April. One of the best ground covers for partial sun or full shade. Space 6 inches apart. Heavy plants with 10 to 20 runners tied together to form one clump. Do not separate clumps but plant as one unit.
- **DAPPLED WILLOW:** Height and spread reach 3 to 5 feet. This is a beautiful new addition to the list of outstanding shrubs. Its main attraction is the tri-color leaves of white, green and pink. We advise periodic trimming to maintain leaf variegation. Tolerates wet conditions. Leaf color stays better in full sun. Size: 8-10” and sold per pot.

46th Annual Seedling Sale Order Form—2021

All proceeds benefit Sweet Arrow Lake County Park

- **ORDER DEADLINE:** Order must be received by **Saturday, March 20, 2021**, and will be filled while supplies last! **No order cancellations or refunds after the deadline.**
- **PICK UP:** Saturday, April 24, 2021 from 9 a.m. to 12 noon for a drive-thru pick up in the Clubhouse circle.
- **NOTE:** Seedlings are bare root and will be healthy at pick up. No guarantees after this date.
- **INFO:** "Porcupine Pat" at 570.391.3326 or porcupinepat@yahoo.com or Kathy Stefanick at 570.345.4963
