

42nd ANNUAL SEEDLING SALE 2017

All sale proceeds directly benefit Sweet Arrow Lake!

Your seedlings will increase property value, enhance wildlife habitat, beautify the landscape, improve the environment, and can provide a source of income. The Sweet Arrow Lake Conservation Association (SALCA) and the Schuylkill Conservation District work together to make this sale possible. ***Your support for Sweet Arrow Lake is appreciated!***

- **CONCOLOR FIR:** Very popular tree! Excellent ornamental or Christmas tree. Has flat, soft green to deep blue citrus-scented needles. Hardy tree as it withstands dry periods and high temperatures. 3 year old seedlings. Size: 6-12.”
- **NORWAY SPRUCE:** Fastest growing of all spruces. Develops pyramidal shape and strong graceful branches that are covered with dark green needles. Ideal windbreaker that likes full sun and grows in various soils. Matures at 60 feet and has a beautiful 25 foot spread. 3 year old seedlings. Size: 7-14.”
- **COLORADO BLUE SPRUCE:** Handsome ornamental or Christmas tree with blue-green needles. Great for wildlife cover. Likes ordinary soil, average moisture, and full sun. 3 year old seedlings. Size: 5-10.”
- **AMERICAN ARBORVITAE:** This slow-growing tree prefers full sun to partial shade but adapts to a variety of soil conditions. Prefers moist soils but withstands drought. It grows to a mature height of 25-40 feet, and has a mature spread of 10-15 feet. Good wind-block and provides cover for all types of wildlife year round. 4 year old seedlings. Size: 10-24.”
- **PIN OAK:** Named for a characteristic where small, thin, dead branches stick out like pins from the main trunk. This is among the most widely planted and fastest-growing native oaks. It tolerates drought, poor soils and is easy to transplant. Popular because of an attractive shape and trunk. The green, glossy leaves show brilliant red to bronze fall color. 1 year old seedlings. Size: 4-12.”
- **KOUSA DOGWOOD:** A flowering dogwood originally native to Japan, Korea and China. A widely planted tree with distinctive creamy-white bracts (sometimes tinged with pink) that appear after native dogwoods. A wonderful addition to any home landscape, it has no serious disease or insect problems. Blooms attract bees and butterflies while the fruit attracts birds and squirrels. The fruit is edible for people too. Bark is rich brown-red and flakes to fresh cream or fawn bark beneath, adding to its beauty. It is mildly sun-tolerant. 2 year old seedlings. Size: 10-24.”
- **RED BUD:** Red Bud grows as a small tree with an abundance of purple blossoms in the spring. It has large heart shaped leaves during the summer, and long seed pods in the fall. Popular landscaping tree. 2 year old seedlings. Size: 9-18.”
- **AMERICAN CRANBERRY:** Excellent deciduous shrub for screening up to 10 to 12 feet high. It grows to a width of 8 feet with very dense growth of up to 3 feet per year in full sun or part shade. This bush has showy white flowers in spring followed by red berries in fall and winter. Berries hang through mid winter making excellent bird feed. This shrub has very few insect problems and prefers good, well-drained soil. For best growth, provide supplemental water during dry periods. For a solid screen, plant bushes 2 to 3 feet apart. 3 year old seedlings. Size: 20-36.”
- **BLACK CHERRY:** Pretty tree with green lustrous leaves, single white flowers in late May producing black cherries in August. Grows best in rich, deep moist soil. Good ornamental turning yellow to red in fall. Highly prized for furniture making, excellent firewood source and provides fruit for many small animals. 2 year old seedlings. Size: 15-30.”
- **WINTERBERRY:** Winterberry is a deciduous shrub growing to 6-15 feet tall and often as wide. It develops a rounded habit through suckering, eventually growing into a sizeable colony of upright stems. The stems tend to be dark brown and often develop a pleasing gray sheen. The 3 inch long, elliptic, toothed, and pointed leaves vary from light to dark green, taking a yellow hue in autumn. Offers bright red berries in late summer. The berries, for which the common name was derived, remain after leaf fall and persist into the winter months to provide food for wildlife. Winterberry prefers evenly moist, acid soils in full sun to partial shade. 3 year old seedlings. Size: 3-6.”

42nd Annual Seedling Sale Order Form—2017

To benefit Sweet Arrow Lake County Park

- **ORDER DEADLINE:** Wednesday, April 5, 2017 or while supplies last!
